on the roadmap

Information Security Liaison Policy

- Drafts of a new ISL Standard to replace the current ISL Policy are being vetted by key stakeholders. Expect to see that new draft published this October, but as always, feedback on any policy is welcomed at any time!

Password Standard

- The Information Security Office is exploring ways to improve the security of authentication processes, while making things straightforward for all of us. ITS is engaging in a project to extend Onyen password duration to 1 year while implementing technical improvements to require stronger passwords. This will require revision of the Password Standard, which is underway.
